

We hereby welcome all submissions to a book entitled “**Interdisciplinary Approaches for Sustainable Development Goals**” which will be published as part of the Springer Series, GeoPlanet, Earth and Planetary Sciences (<http://www.springer.com/series/8821>).

This offer is addressed mainly to young scientists, especially the participants of the Sopot Youth Forum, however, we are happy to accept multi-author works, from applicants not taking part in the Forum. We welcome both research and review papers.

The subject of the paper should fit into a broadly defined range of topics related to the natural environment, the problem it faces, and a widely understood research approach towards sustainable development issues.

Please submit your articles directly to one of the book editors:

- **Socio-economic goals of sustainable development**
(Iwona Sagan, e-mail: geois@univ.gda.pl)
- **Marine biology and ecology**
(Waldemar Surosz, e-mail: waldemar.surosz@ug.edu.pl)
- **Physical problems of marine environment; Climate change**
(Tymon Zielinski, e-mail: tymon@iopan.gda.pl)

Important information:

- Editors: Tymon Zieliński, Iwona Sagan, Waldemar Surosz
- Book language: English
- Article review form: „peer review”
- Suggested article length: maximum number of words not exceeding 10 000
- Payment: none
- Manuscript submission date: 15 July 2017
- Planned date of book publishing: February 2018
